Reduces disbursement of basic fees

Charging support

xEV

All targets with mobile charging cables

Charging E-Mobility in a new way

The Smart Outlet C1 is a billable smart outlet that allows you to receive electricity bills with just the outlet without attaching a separate charger. It can be mounted over the existing wall outlet. After installation, it will be displayed on the map of the dedicated app, so you can find a nearby outlet. If you have a smartphone, you can sign up immediately and use it as convenient as you paid. It uses a Bluetooth connection, but instantly recognizes any device without the cumbersome pairing process. Unlike other billing chargers, you don't have to pay a monthly fee for a separate internet connection or modem. With a cord set charger, you can use it at will, whether it is an electric car or a scooter.

It is full of consideration for user convenience. Just turn on the app and it will automatically find nearby outlets. After selecting the required amount of time and starting charging, it operates immediately and turns off automatically after the entered time. In addition to instant purchase of charging points, it is possible to reserve use in advance if necessary. All information is encrypted with the built-in OTP method, so there is no need to worry about information leakage.

Smart outlet C1

Input

Single phase 100~240 VAC, 60Hz, Max 3.3kW

Output

Same as output

Minimum requirement

Bluetooth 4.0 and later

133(W) X 233(H) X 91(D) [mm]

environment of use

Temperature: -10°C to 40°C / Humidity: 20% to 93%

Operate

Smartphone applications

Charging time

10 hours for 50% charging (for vehicle with 64kWh battery)

e-Mobility Charging Market Place
Become a service operator and make money!

Share the Charging spot

The shortage of charging stations can be effectively solved by using the existing outlet.
The EVZ charging network works as a marketplace for charging. If you want to use your spot as a charging place, anyone can buy an outlet, install it, and register it. The share time and cost are entirely your choice, the marketplace is not involved.

Charge your car with a few click on your smartphone.
Wall outlet-based charging solution for home or workplace.

Find the location and availability on the map

Check the fee and reserve

Pay and charge

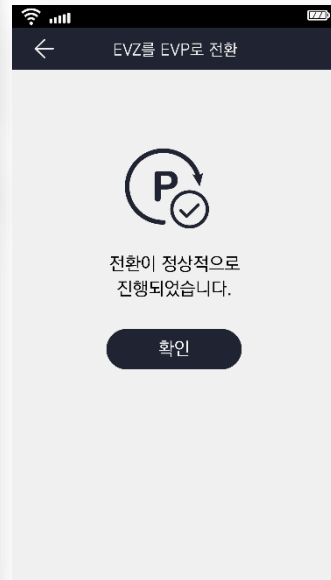

Recharge EVP

Charging complete/
EVP transaction to the host account

Start charging with your smartphone.
Outlet-based charging solution for home or workplace.
